

Special Issue

Navigating the Narrows: Strategies for SDG Governance

Message from the Guest Editors

This Special Issue is aimed at gaining theoretical knowledge and presenting empirical evidence and insights on strengths and weaknesses of different approaches to strategic governance such as strategic planning, strategy as a learning process, and strategising for trade-offs and synergies in different (supranational, national, or subnational) contexts. It revisits the nine ‘strategy schools’ identified by Mintzberg et al. (1998) and the ‘chaos school’ (Stacey 1992), which specifically addresses complexity and unpredictability. With this context as the analytical lens, the Special Issue will present, among others, insights from experiences with national sustainable development strategies, plans, or action plans, with strategic and strategy-forming mechanisms, with strategic learning approaches, as well as case studies on strategic thinking within sustainability transformation processes on, e.g., mobility, agriculture and food, energy, or inequality. The aim is also to include perspectives from different global regions.

- strategies
- strategic governance
- metagovernance
- sustainability
- SDGs

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
