Special Issue

Relation and Development between Circular Economy, Economic Growth and Environmental Sustainability

Message from the Guest Editors

The circular economy concept aims to reshape our economic systems in an environmentally friendly way. based on the principles from Cradle-to-Cradle. In this circular economy, products are recycled without waste, and all products should be easily broken down into different components that can be used to create new products or systems. The circular economy is a systems solution framework that tackles global challenges such as climate change, biodiversity loss, waste, pollution, and biocapacity deficit. Therefore, actively promoting a circular economy is seen as a key way to achieve both resource decoupling and impact decoupling. These two types of decoupling are key imperatives for sustainable development. This Special Issue aims to understand the nexus between the circular economy, economic growth and environmental sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
