

# Special Issue

## Sustainable Urbanization

### Message from the Guest Editors

This Special Issue debates processes of sustainable urbanization in several scientific domains: urban planning, urban regeneration, intra-city food and energy production, self-sufficient cities, urban participatory processes towards a green economy, urban green financial tools, building-led green-innovations, urban sustainable mobility, and integrated sustainable urban development strategies, among others. As such, this Special Issue welcomes the following kinds of contributions

(a) Evidence-based papers illustrating and discussing the implementation of sustainable urbanization processes and their role in fostering integrative, circular, and sustainable urban planning and development processes.

(b) Theoretical papers that propose conceptual visions and appropriate methodologies and indicators to design, implement, and assess sustainable urbanization-related processes.

(c) Foresight papers showing future paths for sustainable urban processes.

Papers selected for this Special Issue are subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments, and applications.

I look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
