Special Issue

Sustainable Civil Engineering and Construction Waste Management

Message from the Guest Editor

The generation of waste is a global problem in need of sustainable solutions. In the EU alone, 2.5 billion tons (2016 numbers) of waste is generated every year. Looking at the construction industry in particular, the generated waste in the EU constitutes 924 million tons, corresponding to 36% of all generated waste. The issue is exacerbated by the fact that the yearly generated construction waste keeps increasing.

To reduce the environmental load of the construction industry, resource consumption and waste management practices need to be improved, together with solutions to minimise waste and handle, recycle and reuse the generated waste. The focus of this Special Issue is, therefore, the improvement of construction waste management. This will include a focus on the traditional means of managing waste in construction projects. Moreover, it will include a focus on the initiatives aimed at reducing wasted resources and reducing waste in general, as well as reusing waste and developing circular solutions. The Special Issue also focuses on approaches to training and educating participants in the construction industry on how to manage waste, as well as waste behavior.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
