

Special Issue

Sustainable Logistics 4.0

Message from the Guest Editor

The proposed Special Issue, Sustainable Logistics 4.0, aims to address the intersection of advanced digital technologies and sustainable logistics practices within the context of the Fourth Industrial Revolution. Industry 4.0, characterized by integrating cyber–physical systems, IoT, big data, and artificial intelligence, is transforming traditional logistics operations, offering new opportunities and challenges for achieving sustainability goals in economic, environmental, and social dimensions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
