

## Special Issue

# AI-Optimized Design and Management in Environmental Engineering Towards Climate-Neutral Infrastructure

### Message from the Guest Editor

The urgent transition to climate-neutral infrastructure demands innovative approaches that integrate cutting-edge technologies with sustainable engineering practices. Artificial intelligence (AI) has emerged as a powerful tool to optimize design, monitoring, and management processes, enabling smarter decision-making in environmental engineering, energy systems, and construction. This Special Issue explores how AI-driven solutions can accelerate the development of low-carbon infrastructure, from energy-efficient buildings to resilient water management systems and renewable energy integration. Key focus areas include the following:

- AI-enhanced modeling for reducing embodied carbon in construction materials and structures;
- Machine learning applications in predictive maintenance of green infrastructure (e.g., smart grids, urban drainage systems);
- Digital twins and IoT for real-time monitoring of emissions and energy consumption in built environments;
- Algorithm-aided planning of circular economy systems in waste and resource management.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
