

Special Issue

Risk Assessment of Surface Water and Groundwater Contamination

Message from the Guest Editors

Groundwater and surface water contamination is a serious issue that can have significant impacts on human health and the environment. It is therefore important to assess the risk of contamination in order to identify and prioritize actions to reduce or eliminate risk. In this Special Issue, our aim is to bring together the latest research and developments in the field of surface water and groundwater quality. We invite papers that address current approaches and techniques used to assess the risk of contamination, as well as case studies and real-world examples of risk assessments. We also welcome papers on tools and techniques to model and predict the consequences of contamination, best practices for managing and mitigating the risk of contamination, and strategies for communicating and engaging with stakeholders on issues related to surface water and groundwater contamination.

We believe that this Special Issue will be of great interest to researchers and experts working in the field of surface water and groundwater quality, especially those interested in environmental protection, and we look forward to receiving your submissions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
