

Special Issue

Sustainable Urban Transport Planning: Challenges and Solutions

Message from the Guest Editors

Sustainable urban transport planning is essential to modern urban development, as cities worldwide struggle with the challenges of balancing mobility needs and environmental, social, and economic sustainability. Rapid urbanization, along with the growing demand for efficient, inclusive, and green transportation systems, has highlighted the pressing need to address congestion, air pollution, inequity, and resource consumption. Innovations in technology, policy-making, and infrastructure design offer promising solutions; however, their effective implementation and integration through a coherent, multidisciplinary, and holistic approach remains a formidable challenge. This Special Issue aims to explore innovative solutions, best practices, and interdisciplinary approaches that can help cities transition toward sustainable mobility systems. This aligns with the journal's commitment to promote research that supports sustainable urban development, providing insights and tools for planners, policymakers, and researchers.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
