

Special Issue

Environmental and Economic Sustainability in Agri-Food System

Message from the Guest Editor

In the face of escalating environmental concerns and the imperative for economic resilience, the sustainability of the agri-food system has emerged as a critical area of inquiry. By examining innovative approaches to sustainable agriculture, efficient resource use, and economic viability, this Special Issue aims to illuminate pathways towards a more sustainable and equitable global food system. This Special Issue seeks to explore innovative research and practices that address the dual challenge of environmental and economic sustainability in the agri-food sector. It aims to bring together interdisciplinary perspectives that examine the dynamics of agricultural practices, food production, distribution, and consumption in the context of sustainability. We encourage submissions that offer insights into sustainable agricultural technologies, policies for environmental protection and economic growth, food security, and the role of circular economies in the agri-food system. Comparative studies, case studies, and reviews that highlight successful models and practices at various scales, from local to global, are particularly welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
