Special Issue

Sustainable Organizational Adaptation: Nurturing Ecosystems for Innovation and Resilience

Message from the Guest Editor

This Special Issue explores the mechanisms surrounding the creation, nurture, and evolution of ecosystems for the engenderment of innovation and resilience which are pivotal for sustainable organizational adaptation. We invite original manuscripts (research articles and reviews) covering, but not limited to, the examination of how complex adaptive systems—particularly ecosystems—can be nurtured to maximize innovation and resilience values for sustainable organizational adaptation and other related topics. We welcome studies deploying quantitative, qualitative or mixed methods as well as timeless (conceptual/theoretical) and timely (practitioner-oriented and readily deployable) studies.

Guest Editor

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
