

Special Issue

Advances in Renewable Energy: Photovoltaic System and Solar System

Message from the Guest Editors

Sustainability adds "nature, environment, energy conservation, comfort" to the definition of solar systems, which is summarized as "robustness, functionality, aesthetics", and causes a change in their scope. Solar energy, which is the most preferred and widely used among renewable energies, is very important for a sustainable world. This Special Issue brings together the fundamental engineering tools and new technological breakthroughs in the development of state-of-the-art PV and solar systems for applications in addressing physical, economic and environmental issues. The cordially invite submissions for this Sustainability Special Issue entitled "Advances in Renewable Energy: Photovoltaic System and Solar System". This Special Issue welcomes original proposals covering the most recent advances and focusing on improvements in photovoltaic systems, as well as different solar systems, for energy and resource efficiency techniques that minimize the amount of energy and materials utilized in the design and production of solar systems while ensuring high performance.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
