Special Issue

Performance Benefits of Circular Economy: Between Convergent and Conflicting Interests

Message from the Guest Editors

This call for papers asks authors to investigate the transition of governments and companies toward a circular approach identifying the incentives and benefits (social, economic, environmental, ...) of CE and analysing the convergent and conflicting interests of the different public and private stakeholders. The main goal of this Special Issue is to fill the knowledge gap regarding benefits and incentives in light of performance goals. Research areas may include (but are not limited to) the following:

- Theoretical and empirical analysis of entrepreneurship in the Circular Economy;
- Recovery processes for industrial wastes and their economic impacts;
- Companies' environmental impact minimization policies (e.g., GHG emissions from wastes transportation) and environmental benefits;
- Benefits of cyclical re-introduction of wastes into the production systems;
- Benefits of innovation in production and processes;
- Investigation into the links between the Circular Economy and the SDGs;
- Contribution of digitisation and new technologies to the Circular Economy, etc.

I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
