Leisure Involvement and Smart Tourism

Message from the Guest Editors

Leisure involvement refers to an individual's level of investment or concentration in leisure-related activities. Leisure involvement significantly varies both from person to person and across different activities. For example, it could involve deep engagement in adventurous exploration activities, participation in nature or cultural trips, immersion in accommodation or culinary experiences, or focusing on sports, board games, or competitive gaming as recreational activities. The synergy between modern technology and smart leisure has resulted in a transformative enhancement of leisure and entertainment experiences overall. Overall, the combination of leisure participation and smart travel can create a more personalized, enjoyable, efficient, safe, sustainable, and forward-looking leisure experience. This integration aims to satisfy and fulfill various consumer benefits such as individual preferences, flow experiences, diverse leisure activities, experience satisfaction, service convenience, efficient travel quality, sustainable tourism, destination attachment, and loyalty.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
