Future Prospects of BIM Management for Sustainability in Smart Built Environment 2nd Edition

Message from the Guest Editors

Over the last several decades, a considerable number of sustainable design and construction approaches for AEC projects have been developed across the globe using a wide range of technologies, tools, and techniques. BIM as a system is still in its early stages, and the solutions it is applied to in the industry are constantly evolving in order to meet the distinctive needs of their users. As technology has advanced in recent years, the use of BIM has proven to be an innovative, useful, and effective factor in the development of sustainable projects, particularly in the processes of designing systems, performance assessment, and, more recently, optimizing them from a life cycle perspective. This entails a wide range of study areas embedded within the process of design, construction, and maintenance, including design innovation and maintenance to reach the highest level of sustainability in the smart built environment. We welcome submissions of original research and reviews on (but not limited to) the following topics: BIM-based innovations and sustainability
BIM-based planning and optimising
Building performance simulation
Building energy simulation

Guest Editors

Dr. Sepehr AlizadehSalehi

Dr. Lavinia Chiara Tagliabue

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
