Special Issue

Advancements in Sustainable Building Design: Enhancing Indoor Comfort and Resilience in Extreme Weather Conditions

Message from the Guest Editors

This Special Issue aims to gather research efforts focused on innovative technologies and strategies for monitoring, maintaining, and controlling indoor environmental parameters in the face of extreme weather events caused by climate change. The primary objective of this issue is to explore sustainable building design solutions that optimize indoor comfort while ensuring resilience and adaptability to future environmental challenges. Scholars are invited to contribute research articles, reviews, communications, and concept papers, presenting their findings, methodologies, case studies, and conceptual frameworks. Our goal is to advance knowledge in the field of sustainable building design, with a specific emphasis on addressing the complex challenges posed by extreme weather conditions and climate change. This issue seeks to foster interdisciplinary discussions and provide a platform for sharing cutting-edge advancements that can contribute to the development of more resilient and environmentally conscious built environments.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
