

Special Issue

Sustainable Technology and Policy: Energy Transformation under Decarbonization

Message from the Guest Editors

This Special Issue addresses the energy transition under decarbonisation conditions, understood as the implementation of an ambitious policy of reducing emissions and a stronger link with both the electricity market and the primary fuel market. The key element of the transformations is sustainable technology, which supports the development of innovative solutions in line with Poland's Responsible Development Strategy. Undoubtedly, these issues have a significant impact on the functioning of both the global electricity and primary fuel markets. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: Markets for primary fuels; electricity and renewable energy; current state and development prospects for energy markets; energy transformation; modern technologies for the extraction, processing and use of natural resources and the production of their substitutes, forecasting prices and modelling dependencies on energy markets. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
