

Special Issue

Sustainable Research on Hydrogen Energy and Hydrogen Storage

Message from the Guest Editor

This special issue invites cutting-edge research on hydrogen energy technologies to address global energy transition challenges. We seek contributions covering advanced hydrogen production (electrolysis, biomass conversion), innovative storage solutions (compressed/liquid hydrogen, metal hydrides, chemical carriers), and transportation infrastructure. The issue will highlight applications across science and engineering, including mobility solutions and refueling technologies, while examining economic and environmental impacts. By sharing novel findings in materials development, system optimization, and policy frameworks, this collection aims to accelerate hydrogen's role in sustainable energy systems. We welcome both original research articles and comprehensive reviews that advance our collective knowledge in this critical field. Researchers are encouraged to submit work that bridges fundamental science with practical engineering applications, fostering collaboration across academia, industry, and policymaking communities to drive the hydrogen economy forward.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
