

## Special Issue

# Sustainability in Organizational Change and Leadership Development

### Message from the Guest Editor

We are currently living in a context of sudden and unprecedented disruptions that continue to challenge the sustainability of small entities, large corporations, and state-led institutions all over the world. Nowadays, decision makers increasingly recognize that systemic change is imminent, necessitating new *modi operandi* and approaches to leading that are more dynamic, inclusive, accountable, and transformative to better prepare actors to embrace change and face the constantly evolving and unpredictable future.

This Special Issue aims to ignite provocative research questions, encourage meaningful conversations, share best practice advice, and offer preliminary reflections on recent experiences of people, teams, businesses, and nations in leading change to achieve sustainable outcomes. We encourage submissions from a wealth of theoretical and methodological traditions that address various aspects related to sustainability in organizational change and leadership development. Scholarly contributions that tackle this intriguing and thought-provoking subject from a cross-disciplinary vantage point are particularly welcome.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
