Special Issue

Human-Bat Interactions and Sustainable Conservation

Message from the Guest Editors

Bats, arguably more than most other taxa, face an image crisis (they are widely maligned), which makes bat conservation more challenging. Furthermore, research on human-bat interactions often focuses on conflict, whereas reports of successful conservation interventions are underrepresented. The aim of this Special Issue is to provide a platform to explore the spectrum of human-bat interactions and present successful interventions that have addressed human-bat conflicts in different contexts. We particularly invite manuscripts addressing:

- Interventions intended to solve human-bat conflicts; here, we invite success stories as well as manuscripts reporting on lessons learned from less-successful interventions.
- Social science theories and concepts applied to the antecedents of human-bat conflicts (e.g., attitudes, emotions, beliefs etc).
- The full spectrum of human-bat interactions (i.e., positive and negative).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
