

Special Issue

Actual Trends of Logistics and Industrial Engineering

Message from the Guest Editors

This Special Issue is dedicated to sustainability in the field of logistics and production engineering. Actual Trends of Logistics and Industrial Engineering presents the issues that play a significant role in different industries. It reflects the latest knowledge that fully reflects the needs of science and industrial practice.

Another major challenge for this area is Industry 4.0 and the associated implementation of its individual approaches into application practice. This Special Issue will create a space that will provide opportunities for the presentation of the selected problem areas related to sustainability in the area of logistics and production engineering. The aim is to create a link between theory and practice.

This Special Issue welcomes contributions that marginally relate to this field, or have an interdisciplinary character, as a full paper, short communication, or review. The authors are advised to submit innovative applications of research solutions. Trends of logistics and industrial engineering, analyzed in the research, need to be well depicted from an application point of view, and a particular emphasis needs to be given to their economic cost.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
