

Special Issue

Low-Carbon Affordable Houses for Sustainable Societies

Message from the Guest Editors

Currently, the majority of countries and cities with rapid population growth rates are located in hot regions such as Asia and Africa. In these developing countries, housing backlog is often the most urgent issue and, thus, affordable houses are in high demanded. On the other hand, when considering the Paris Agreement, all signatory parties—including developing countries—are now required to declare their “nationally determined contributions” (NDCs) and to put their best efforts toward combating climate change for a sustainable low-carbon future. The developing countries are thus required to achieve both “affordability” and “low carbon” at the same time as part of their housing provisions. This Special Issue will focus on themes that deal with innovative methods for achieving comfortable conditions, ranging from indoor thermal comfort, energy efficiency, and indoor environment quality under poverty. Mitigating the limitations of resource constraints in the upcoming houses of the Global South is a challenge that requires innovations in building science.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
