

Special Issue

Sustainable Agri-Food Systems: Environment, Economy, Society and Policy

Message from the Guest Editors

Over the last few decades, food systems have been central in the debate on sustainable development, such as in the context of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals (SDGs). The challenges have been exacerbated by the COVID-19 pandemic that has highlighted the unsustainability and vulnerability of modern food systems and caused an impending global food emergency.

This Special Issue addresses but is not limited to the following topics:

- Conceptualization, design, and operationalization of sustainable food systems at different levels (global, regional, national, city-region, local);
- Methods, approaches, and models for the assessment of agri-food sustainability in food systems (production/agriculture, processing, distribution, consumption, waste management);
- Sustainability transitions in agri-food systems (theories, frameworks, models, good practices, and promising initiatives);
- New generation of food policies (integrated, multisectoral) and governance models (inclusive, multi-stakeholder, reflexive) for sustainable food systems;
- Effects of the COVID-19 pandemic on the functioning, performance and resilience of agri-food systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
