

## Special Issue

# Sustainable Agricultural Management Practices Effects On: Soil Quality, Productivity and Environmental Resilience

### Message from the Guest Editors

Traditional and intensive agricultural practices have led to soil resource exhaustion, while also compromising productivity. During the last few decades, promising management practices have been suggested. There is a current need for studies targeting direct effects of promising management practices on the soil quality as a whole, and also the general effect of soil quality status on agricultural productivity. For this Special Issue, we invite papers investigating the effects of promising management practices on soil physical, chemical, and biological parameters, soil degradation, soil functions and ecosystem services. We welcome comparative studies that go deeper in understanding the productivity gain/loss and the conceptual understanding of the link between soil quality and yield. Review papers are also welcome that systematically aggregate information concerning promising practices already in use.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
