# **Special Issue**

# Recent Advances in Agricultural Wastes for Sustainable Biofuel Production

## Message from the Guest Editors

With the rising world population and advancement of technology, the energy demand has also increased, subsequently straining the conventional fossil fuel energy supply. Furthermore, the price of crude petroleum is unstable and generally rising, and it is often subject to political maneuverings. Additionally, fossil fuels release pollutants that are harmful to both humans and the environment. Thus, research has focused on alternative energy sources, such as biofuels, wind energy, tidal energy, etc. Biofuels, such as biogas, bioethanol, biodiesel, and biohydrogen, are gaining attention worldwide as renewable and sustainable energy sources, unlike finite fossil fuels.

Research papers, reviews, and short communications on "Recent Advances in Agricultural Wastes for Sustainable Biofuel Production" are encouraged for this Special Issue. Research areas may include (but are not limited to) the following: catalyst synthesis, agricultural waste fermentation, and anaerobic digestion of agricultural waste for biogas production; and bioethanol, biogas, biodiesel, and biohydrogen production.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
