Special Issue

Agrifood Production and Conservation Agriculture

Message from the Guest Editors

Globally, the agricultural production system faces multipronged challenges of soil degradation risk by erosion and nutrient loss, a sharp decline in soil organic carbon pool (SOC), climate change, a shift in pest complex, vield stagnation, energy intensiveness, and poor economic returns, making farming a non-profitable enterprise. Thus, there is an urgent need to emphasize the conservation effective technologies, sustainable intensification, climate-resilient, and eco-efficient agriculture to achieve the numerous millennium sustainable development goals (SDGs). Conservation agriculture (CA) is one such approach to potentially address multiple challenges and enhance crop productivity, profitability, and environmental sustainability. CA-centric soil and crop management practices can play a vital role in addressing issues related to agri-food insecurity and environmental sustainability. CA offers an opportunity to rehabilitate degrading natural resources, save time, labor, and energy besides reducing greenhouse gas (GHG) emissions, production costs, making farming a resource-efficient and profitable venture.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
