

## Special Issue

# Agroforestry for Sustainable Rural Development

### Message from the Guest Editors

The main aim of this Special Issue is to evidence the socio-economic and biophysical impacts of agroforestry systems and practices under different perspectives, involving multi-disciplinary research and addressing a broad range of outputs. The Special Issue will cover all the disciplines dealing with agroforestry:

- Mitigating climate change with agroforestry.
- Agroforestry and adaptation to climate change.
- Agroforestry for combating land degradation and desertification in dry areas.
- Agroforestry and biodiversity conservation.
- Agroforestry for water quality and watershed restoration.
- Social and cultural issues in agroforestry systems.
- Agroforestry education, training and promotion.
- Jobs, business, and finance linked to agroforestry.
- Economics of agroforestry.
- Agroforestry adoption and scaling up of agroforestry innovations.
- Value chains and certification of agroforestry products.
- Policies dealing with agroforestry.
- Agroforestry and landscapes.
- Urban and peri-urban agroforestry.
- Agroforestry germplasm.
- Agroforestry pests, diseases and weeds.
- Biophysical modelling in agroforestry systems.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
