

Special Issue

The AI-Augmented Smart Transformation for Sustainable Governance

Message from the Guest Editors

This Special Issue explores the landscape of AI technologies and AI-augmented practices in government and identifies the contemporary issues and challenges for the phased adaptations toward sustainable development. This Special Issue will contribute to search for ways to make changes and prevent future substantial failures for government and society. This issue welcomes analytical, descriptive, and explanatory approaches focused on policy initiatives, case studies, empirical evidence, and novel insights to promote AI-augmented sustainable governance in the local, national and international context.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
