# Applications of Business Model Innovations for Multi-Sized Software Companies for Sustained Competitive Advantage

### Message from the Guest Editors

The continuously changing business environment fosters the need for reinventing business models of the companies for attaining a sustained competitive advantage. Software startups continuously innovate their business models, while software companies should also work like startups, i.e. flexible, agile, and continuously innovating to attain a sustained competitive advantage. The companies cannot afford to execute a stable repeatable and scalable model; it must be innovated continuously. Software startups struggle to identify scalable and repeatable business models during initial phases through series of experimentations. Once such business models are identified, they are executed to attain growth in the markets. At one stage, the startups turn into companies. The business models of startups and companies cannot remain static, in fact they must continuously analyze the trends and changes in the business environment to transform their business model, to remain competitive. ## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
