

Special Issue

Aquatic Ecosystems and Sustainable Water Resources Management

Message from the Guest Editors

Despite the rapid elevation of aquatic ecosystems into management realms, especially at the country level, and the prominence given to them by global programmes, they tend to be overlooked in favour of socioeconomic development. While the SDG list of indicators in support of natural resources is moderately comprehensive, it lacks holistic monitoring in relation to the evaluation of ecosystems and biodiversity to the extent that these missing-but-vital measures of sustainability threaten the entire SDG Agenda. In addition, an emerging issue is that even where there are indicators, the number of country-level data remain inadequate for evaluating sustainability, a reality that confronted the UN team trying to draft the SDG 6 synthesis report. This Special Issue will focus on collecting research, at whatever scale, that documents the role of aquatic ecosystems in resource management, with the emphasis being on sustainability and the means to generate the data required to monitor this.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
