Archaeology of Sustainability and Sustainable Archaeology

Message from the Guest Editors

In the context of archaeological research and practice, the subject of *Sustainability* has a two-fold implication. From one side, the archaeological record provides evidence of sustainable practices carried out by ancient communities in different ecological niches around the globe. Adaptations to climatic and environmental variations, strategies for the exploitation and management of natural resources (soil, wood, water, etc.), changes in land use, and examples of resilience or fragility of human societies are commonly detected in the archaeological record and, at a large scale, in archaeological landscapes. In the context of the current climatic shifts, such information is a precious tool to build narratives for the public about the risks human communities face in front of a rapidly changing environment, and to show lessons from our shared past. Furthermore, it is increasingly acknowledged among scholars and policymakers that the current character of socioecological systems depends on their long-term evolution, which only archaeological research can unravel. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
