

## Special Issue

# Advanced Technologies and Applications in Sustainable Architecture and Urban Design

### Message from the Guest Editors

This Special Issue aims to bring together high-quality works on theories, frameworks, perspectives, literature reviews, technology applications, case studies, and innovative research and development that have been developed worldwide in the search for answers to these questions. The results or key findings of these works will provide a strong reference for subsequent scholars and researchers. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Big data mining, analysis and utilization;
- AI applications in architecture and urban planning;
- Automation in sustainable architecture;
- Robotic architecture;
- Green renovation of existing building;
- Performance-based sustainable architecture and urban research.

We look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
