

Special Issue

Artificial Intelligence Applications in Power and Energy Systems

Message from the Guest Editor

Artificial intelligence technologies have played an active role in improving grid driving capabilities, ensuring energy security, reducing energy waste, promoting the development of new energy, and better serving economic and social development. Strengthening the application of AI in power and energy systems is conducive to improving the operational efficiency and energy utilization of power systems, promoting the reform of power systems, promoting the intelligence of power systems, and achieving carbon emission reduction goals, and is also important in the current development of energy systems. This Special Issue welcomes original research articles and reviews discussing the latest research. Topics include the following: smart energy markets in the context of carbon emission reduction, smart grid operation optimization under the background of carbon emission reduction, smart grids, big data and power systems, smart forecasting and scheduling, green power automation, energy-oriented data mining and artificial intelligence technologies, energy internet, information and communication technologies, smart machines in power systems, techno-economic aspects of smart energy systems, etc.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
