

## Special Issue

# Artificial Intelligence and Cognitive Computing: Methods, Technologies, Systems, Applications and Policy Making

### Message from the Guest Editors

Cognitive computing has received increasing attention from academia and industries as it brings cognitive science and computing together for the development of new computational platforms, infrastructures, systems, and algorithms. Artificial intelligence and computational intelligence are key elements to success in cognitive computing. To this end, the of this Special Issue seek papers that address, but are not limited to, the following issues related to the diverse aspects of artificial intelligence and cognitive computing research:

- Artificial Intelligence and Cognitive Computing Topics
- Artificial Intelligence and Cognitive Computing Technologies
- Artificial Intelligence and Cognitive Computing/industry Applications
- Policy Making on AI and Cognitive Computing

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
