

Special Issue

Benefits and Co-benefits of Natural and Built Environment Requalification and Conservation Strategies: Advances in Multidisciplinary Valuation Approaches and Assessment Models

Message from the Guest Editors

This Special Issue aims to stimulate the debate on co-benefit valuation approaches and contribute to the proposal of advanced valuation and assessment models of natural and environmental resources and cultural goods, specifically related (but not limited) to:

- Stated preference methods (contingent valuation, conjoint choice analysis, etc.);
- Revealed preference methods (spatial hedonic regressions, travel cost method, production functions, etc.);
- Benefit and value transfer approaches;
- Multicriteria approaches.

Relevant topics include also cost-benefit and cost-effectiveness analysis of investments in:

- Building energy retrofit;
- Cultural heritage conservation and valorization;
- Urban regeneration;
- Abandoned urban areas requalification.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
