# Behavioral Economics and Sustainable Public Policies

### Message from the Guest Editors

The world is facing major issues to ensure the future of our environment, and humans are as much part of the problem as they need to be part of the solutions. Acknowledging people as part of the ecosystem, public policies need to be grounded on empirical evidence about how people actually behave in order to be able to present more sustainable solutions and interventions. Human environments are not simple predictable rational machines, but rather systems usually characterized by high levels of uncertainty and change. In fact, behavioral economics, as an area of research that tests the classic rational assumption by identifying consistent behavioral patterns, has continuously shown how humans systematically violate these classical assumptions. Understandably, research in behavioral economics and sustainable public policies has gained more and more attention over the last few years, identifying concrete implications to policy design.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
