Special Issue

Accelerating Bioeconomy Growth through Applied Research and Policy Change

Message from the Guest Editors

Global economic growth is slowing, and several economies are suffering from recession, unemployment, and/or environmental destruction challenging sustainable development. These developments are reinforced by the current COVID-19 pandemic. Developments in biology are expected to allow for technical change addressing many of these challenges. Reaching these expectations will require an institutional and policy environment supporting investments and technical change. This Special Issue examines the possible contributions of the bioeconomy to economic growth, employment, and the environment and addresses how institutions and policies can support these contributions. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
