

Special Issue

Bioenergy and Sustainability

Message from the Guest Editor

The decarbonization of the energy sector is an important mechanism to mitigate the effects of climate change. Renewable energy, including wind, solar, and bioenergy technologies, can significantly contribute. Bioenergy already contributes around 10% of the world's primary energy. However, bioenergy has resource implications for land, soil, and water. In addition, competition for the production of food and fiber may exist. Bioenergy resources require global supply chains but create business and employment opportunities. Therefore, understanding the linkages between bioenergy and sustainable development is essential.

The focus of this Special Issue is to examine the role of bioenergy in contributing to sustainable development and the long-term goal of sustainability. The scope is to contextualize bioenergy in the sustainability literature and to ensure sustainable development pathways can be achieved, for example, sustainable bioenergy production sustainability assessments, sustainable business models, and the circular economy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
