

Special Issue

Biomass and Waste Recycling

Message from the Guest Editors

Composting is a natural process involving the biological degradation of organic wastes (livestock manure, sawdust, kitchen waste, green waste, household waste, sewage sludge, etc.) under aerobic conditions. It plays an important role in the reduction in waste volumes and produces a valuable end-product for agriculture and gardening. This Special Issue aims to provide a scientific forum for organic wastes composting, organic farming, and ecological agriculture. In other words, the objective is to examine the scope and polyhedric character of microbiology in composting processes and composting engineering, long-term field trials on compost use, and development of antibodies for the immunoassay of pesticides, animal drugs, and POPs in food and environmental samples. Papers selected for this Special Issue will be subject to a rigorous peer-review procedure for guaranteeing the journal's standards of publication and the wide dissemination of research results and conclusions, developments, and applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
