Special Issue

Bio-Based Materials and Energy under Circular Economy Approaches

Message from the Guest Editors

The efforts put in transition from a linear to a circular economy have provided innovative ways of design thinking and enabled new business models based on industrial ecology. In the circular economy pathway, all residues are rather faced as resources, which are expected to support achievement of the Sustainable Development Goals and environmental protection standards. Moreover, the circular economy agenda urges a step forward to cope with population growth and changes in consumption patterns that are putting pressure over the soil-water-energy nexus. As such, more research is needed to assess whether biobased recycled materials and energy can replace conventional products in a cost-effective and environmentally sustainable path. This Special Issue seeks to fill these gaps and aims to highlight the merit of bio-based materials and energy in both research and industry axes. To this end, this Special Issue will collect contributions on disruptive technologies, processes, products, and industrial synergies that rely on circular economy principles.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
