

Special Issue

Biophysical Sustainability of Food System in a Global and Interconnected World

Message from the Guest Editor

Throughout human history, local geographic and environmental circumstances combined with socio-cultural and political arrangements have determined societies' food security and sustainability. In recent decades, population growth, technological developments, changing material standards of living, and global economic integration have fundamentally changed food systems, to an extent that most societies worldwide are part of a global food system. Indeed, a growing number of studies in recent years have acknowledged the need for such interspatial/tele-coupled perspectives. It follows that the aim of this Special Issue is to publish the latest research on food systems sustainability in an interconnected world. We invite new insights supported by empirical data, methods, and analyses of relevant case studies exploring the various socio-ecological aspects of food systems sustainability in today's world and the implications for the future.

Guest Editor

Prof. Meidad Kissinger

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
