

Special Issue

Blockchain for Sustainable Supply Chains

Message from the Guest Editors

This Special Issue aims to collate important investigations in blockchain technology (BCT) innovations and provide an opportunity to improve supply chain sustainability based on the use of novel technological, organizational, and societal settings, involving BCT. We look forward to unveiling strong practical and theoretical implications concerning how BCT integrates with and impacts new business models, transforms relationships, and improves organizational, societal, environmental, and other types of sustainability in supply chains.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
