

Special Issue

Blockchain and Agile Management - Important Tools for Circular Economy

Message from the Guest Editors

Present economic, societal, and ecological challenges require addressing urgently, as the consequences for the next generations will be disastrous if ignored. Therefore, the future's legacy should be a system of new and sustainable solutions. For this Special Issue, topics of interest consider subjects such as innovation, waste management, new economic and ecological systems, smart consumption, production, business strategies, green public procurement, and agile management. Moreover, acceptance imposes conditions for the adoption of a circular thinking model, such as a circular economy, and the implementation of sustainable solutions such as such an economy, eliminating the concept of waste, and simultaneously changing how the economy produces goods and what society and the economy consume. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
