

Special Issue

Boundary Organizations & Sustainability

Message from the Guest Editor

Boundary organizations are formal organizations designed to mediate between the science and policy communities and bridge their diverse purposes, incongruent values, and potential mutual incomprehension so that science and policy can mutually inform one another. However, despite substantial research and investment in creating boundary organizations for sustainability, systematic knowledge about how their activities are shaped by different types and qualities of social interaction, the broader organizational and socio-political environments in which they are embedded, and power relationships among actors within them is meager. For this Special Issue, we invite articles that analyze the social organization of boundary organizations aimed at promoting environmental sustainability. We are particularly interested in articles that utilise fresh conceptual approaches to understand boundary organizations.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
