

Special Issue

Healthy and Sustainable Built Environment Solutions towards Building Decarbonization

Message from the Guest Editors

This Special Issue “Healthy and Sustainable Built Environment Solutions towards Building Decarbonization” aims to discuss solutions towards a healthy and sustainable built environment within the context of building decarbonization. It is open to all sustainable science and engineering disciplines and research addressing the issues and progress for current and future built environments. Research areas may include (but are not limited to) the following:

- Ventilation systems and technology to create better indoor and outdoor environments and save energy for cooling (ventilative cooling);
- High-energy-efficiency building science and technology towards decarbonization;
- Innovations in the building envelope in extreme hot/cold climates to reduce building carbon emission;
- Intelligent control and monitoring of built environments;
- Healthy building environments;
- Building integrated photovoltaic and indoor thermal environments;
- City and building aerodynamics and indoor air quality.

Any inquiry, please contact Mark Huang .

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
