

Special Issue

Building Design Projects for Sustainable Architecture

Message from the Guest Editors

Building design processes and the level of commitment to sustainable principles are influenced by numerous factors related to the market, local regulations, and the general culture of the industry. Pushing all these influential factors toward achieving accelerated changes in industry and people's mindset and lifestyle with a view to drastically reducing greenhouse gases emissions is not only a challenge but an obligation. This Special Issue calls for papers which reflect upon advances in building design processes leading to sustainable architecture in its broad sense. Papers covering not only drivers, but also threats and obstacles to implementing proven theoretical and practical design methods, are welcomed.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
