

Special Issue

Human-Centric Building Energy Efficiency Research for Sustainable Development

Message from the Guest Editors

Dear colleagues, This Special Issue of *Sustainability* is aimed at collecting scientific contributions designed to keep humans in the loop of up-to-date solutions for achieving building energy efficiency in view of urban sustainable development. To this aim, energy and environmental benefits of human-centric building design and operation should be assessed, including occupants' well-being. Moreover, the analysis and leverage of users' energy awareness for more sustainable cities and communities are critical aspects to be addressed.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
