# **Special Issue**

## Environmental and Economic Optimisation of the Building Envelope for Different Climates

### Message from the Guest Editors

This Special Issue aims to collect original research articles and reviews related to the environmental and/or economic optimisation of the building envelope for one or more countries or climate regions regarding the design of sustainable and energy-efficient buildings. Both theoretical and real case studies can be considered. Research areas may include (but are not limited to) the following:

- eco-efficient building envelope alternatives that minimise the life cycle environmental impacts and costs;
- environmental and economic life cycle-driven design of the building envelope;
- optimisation of the environmental and/or economic performance of the building envelope using generic or tailor-made algorithms;
- contribution of local climatic conditions and construction practices to life cycle carbon footprints, as well as the embodied energy and costs of buildings;
- trade-off between life cycle carbon footprint, embodied energy, and costs in each local context; and
- influence of regional differences in optimal solutions for the building envelope.

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Marc A. Rosen Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
