Sustainable Building Materials: An Eco-Approach for Construction

Message from the Guest Editors

In recent years, the importance of sustainable development has been evaluated in the construction industry, aiming towards eco-friendly goals such as the use of recycled materials and preventing the production of waste, while increasing efficiency in the uses of resources and energy. Moreover, the increase in the prices of traditional construction products makes eco-approaches more appropriate in that they will result in energy savings during construction. Materials are important components that can improve overall sustainable performance in the construction industry. They also impact the environment throughout the life cycle of a building. Evaluating the properties of sustainable building materials on the environment is key to the design and construction of green buildings. The papers in this Special Issue focus on emerging techniques and the most recent developments in sustainable building materials. We look forward to receiving your contributions. Dr. Masoomah Mirrashid

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
