Special Issue

Enhanced Building Energy Performance through Materials Innovation

Message from the Guest Editors

The purpose of this Special Issue is to concentrate on the most relevant enhancements proposed by new approaches to building materials, their processing, and complete lifecycle re-design. The expected scope includes all relevant approaches, namely concentrating on:

- Phase-changing materials (PCMs) and their integration in building envelopes;
- Cellular materials and their functional development;
- Natural renewable materials engineered for long durability and a negative carbon impact;
- Hybrid materials design for shape and functional enhancement;
- Multilayered solutions for enhanced structural materials;
- Bio-inspired materials innovation;
- 3D-printed building solutions for multifunctional performance;
- Sandwich materials as integrated solutions;
- Thin-films and inkjet-printed design of efunctionalities on advanced materials processing to building materials;
- Passive design of building subsystems;
- Modular construction and circularity;
- Building materials reuse and reconditioning—from waste to value;
- Assessment of materials' impact on building certification and carbon reduction.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
