

## Special Issue

# Integration of BIM and ICT for Sustainable Building Projects

### Message from the Guest Editor

The digitalization of the construction industry, represented by BIM, should not just produce a simple electronic file type report; it must be able to link, search, and analyze information based on objects. BIM has not just recently been developed; its level and field of use are diverse. In addition, the value of the information available in the construction industry can be maximized by integrating BIM with the latest ICT technology. These technical endeavors require a multidisciplinary approach in order to examine, explore, and critically engage with issues in the construction industry. This Special Issue welcomes all technology developments, case studies, empirical investigations, and experimentations related to the integration of BIM and ICT for sustainable building projects. The scope of the work includes, but is not limited to, the following: Integration of BIM and ICT; Digital technologies and lean construction; Sensing technologies and quality control; Automation and robotics; Big data analytics for sustainable building; Real-time location intelligence; Real-time monitoring of building environment; Assessment of information value.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
